

To FCC,I would like to add my voice to those who benefit from local information and services provided by Satelite Radio.

I do not believe that the services provided by Satelite Radio infringe upon, or unduly restrict, efforts and services provided by local broadcast providers.

For those citizens who travel frquently, either due to necessity or choice, the ability to easily and quickly access information and services for a specific locale is not only convenient, but, at times, a safety issue.

I respectfully urge you to reject petition 04-160.

Thank you,

Drew Jones
